Coupa P2P Process Overview

There are a few different ways invoices will come into Coupa:

- cXML, Coupa Supplier Portal or Supplier Actionable Notifications: Suppliers are able to flip PO into an invoice and come back into Coupa. Invoices do not require manual intervention by AP or anyone at MHI-EMEA if the invoice amount matches PO amount and Goods Receipt (to be explained)
- Emailed to Coupa Inbox: AP enters invoice details manually into Coupa or matches line items to a PO in Coupa.
- Manually enter paper invoice: AP or user enters invoice details manually into Coupa.

Spend Scope Profile

Processed in Coupa with PO	Processed in Coupa w/o PO	Processed outside of Coupa i.e. SAP/Concur/Other
All external, negotiable spend generating supplier invoices. For example (non-exhaustive): ▪ Office Supplies & Equipment ▪ IT Hardware/Software ▪ IT Consulting & Staffing ▪ Telecommunications Services & Equipment ▪ HR - Relocation, Trainings, Recruitment & Development ▪ Facilities Services & Supplies ▪ Marketing and Promotional Products ▪ Consulting Services ▪ Advertising and Communication Services & Fees ▪ Audit ▪ Events ▪ General MRO (non-inventoried items & select affiliates) ▪ Utilities (Gas & Electricity) ▪ Temporary Staffing (potential to be included at a later stage)	All non-PO invoices with suppliers who are loaded into Coupa for PO purchases	Indirect procurement should primarily be conducted through Coupa. However, in exceptional cases, the use of system outside Coupa is permitted. This includes cases where internal regulations or legal requirements prohibit the use of Coupa. Such as: ▪ Travel & Employee Expenses ▪ Inventoried Items ▪ Direct Categories, including – Contract labor working on plant floor – Software purchases unique to plant machine operation/maintenance ▪ Purchases and contract labor tied to sales orders and/or projects ▪ Intercompany Spend ▪ Categories where corporate card is used ▪ Government Payments (taxes, permits, etc.) ▪ Direct Debit

Screen layout of Coupa home page

DEMO

This information is completed in order to begin a purchase request

Freeform Request

These are links to "punchouts", which are external catalogs where MHI employees can shop

The screenshot shows the Coupa home page interface. At the top, there is a navigation bar with links: Requests, Orders, Invoices, Sourcing, Suppliers, and Setup. Below this is a blue header area with a greeting "Good afternoon!", a search bar with the placeholder "What do you need? Start your search here", and a "Write a request" button. To the right of the header is a "Forms" dropdown menu. Below the header, the page is divided into two main sections. The left section, titled "Recent Activity", contains a list of recent orders with details such as item name, supplier, date, request number, purchase order number, and status. The right section, titled "User Portal", contains a "Additional Stores" section with logos for Dell Technologies, eeze, and Lyreco, and a "To Do" section with a list of tasks, including an invoice approval. Annotations with red arrows point to various elements: "This information is completed in order to begin a purchase request" points to the search bar; "Freeform Request" points to the "Write a request" button; "These are links to 'punchouts', which are external catalogs where MHI employees can shop" points to the "Additional Stores" section; "Here, a user can view his or her recent orders, as well as the status of each order" points to the "Recent Activity" section; and "The to-do menu will populate with a user's custom notifications, such as reminders to approve requests or Create Receipts." points to the "To Do" section.

Four ordering methods (purchase scenarios)

Method	Description
(1) Punchout	This is a method of selecting and purchasing products directly from the supplier catalog.
(2) Free form	Free form purchases require a detailed description and specific product information.
(3) Search	This is a way to search for products from internal or external databases or catalogs.
(4) Blanket PO	A request to purchase a bulk of items needed on a regular basis. The period and quantity must be specified. When creating a blanket PO, the service option is commonly used.

DEMO

(1) Punchout

1. Please click on the supplier's punchout link to visit their website.

The screenshot displays a procurement system interface. At the top, a navigation bar includes tabs for Requests, Orders, Invoices, Community, Inventory, Sourcing, Suppliers, Items, Reports, and Setup. Below this, a blue header area features a greeting "Good afternoon!", a search bar with the placeholder "What do you need? Start your search here", and a "Write a request" button. The main content area is divided into several sections: "Recent Activity" with a "View All" link, "System Announcements and Notifications" listing vendor invoice mailboxes, "Contracts" showing "Amazon Canada Punchout" with a value of "0.00 of 0.00 USD", and "Additional Stores" displaying a grid of supplier logos. A red box with a green circle containing the number "1" highlights the "shi" logo in the "Additional Stores" grid. Other logos visible include amazonbusiness, CDW, eppendorf, GRAINGER, Newark, ULINE, and WEBER SUPPLY.

(3) Review and Edit Cart - **Ship To**

General Info: Include shared details for all items, such as on behalf, and the purchase reason.

1. The Ship To **Address** is automatically displayed based on user information.
2. If delivering to a different address, click the magnifying glass icon to open the **Choose an Address** window.
3. In **Choose an Address** window, choose a pre-registered address to update the Ship To Address. If the desired address isn't pre-registered, ask the administrator to add it (local admin can do this)
4. The **Attention** field automatically displays either the address information stored in the profile or the name of the logged-in user. If shipping to a different address, you can modify it as needed. Note that leaving it blank will display the name and phone number of the logged-in user on the order form.

(10) Review and Edit Cart - **Add Approver or Watcher**

Before Submitting the requisition, if you need to add an **Approver** or **Watcher** for this requisition

1. Click the **Add** button.

(10) Review and Edit Cart - **Add Approver or Watcher (Cont.)**

2. Please enter the name you wish to add to this approval chain, or select a watcher.

3. Then select the approver position from the drop-down list. (If you want to select a watcher, please choose **'As Watcher'**).

The screenshot shows the 'Approvers' form with two callouts. Callout 2 points to the 'Name' dropdown menu, which displays 'Yuriko Hashimoto (yuriko.hashimoto)'. Callout 3 points to the 'Approver Position' dropdown menu, which displays 'After Current Approver'. The form includes 'Cancel' and 'Add' buttons at the bottom.

4. Then click the **Add** button

The screenshot shows the 'Approvers' form with the 'Name' dropdown set to 'Yuriko Hashimoto (yuriko.hash)' and the 'Approver Position' dropdown set to 'After Current Approver'. The 'Add' button is highlighted with a red box and a callout number 4.

(10) Review and Edit Cart - **Add Approver or Watcher (Cont.)**

5. The approver has been added , then please Save, Save for Later or Submit for Approval for this requisition.

(11) Review and Edit Cart - **Save**

Save saves your current shopping cart requisition. Cart items remain in your current cart.

1. If you want to save the requisition, click **Save** button.

(11) Review and Edit Cart - **Save (Cont.)**

2. If you want to edit or add items to the saved requisition, you can do so by a) or b) as shown below.

a) Click on **Review Cart** in the upper right corner and edit the request.

b) Click on the **Requests** tab and edit your requisition. If the Requests tab is not available on the homepage, click on **Recent Activity** -> **View All** and search for the Requisition list to edit.

(12) Review and Edit Cart - **Save for Later**

Save for later also saves current shopping cart requisition but it places it in draft status and opens a new requisition shopping cart that the user can work on in the meantime.

1. Click **Save for Later** button.

(12) Review and Edit Cart - **Save for Later (Cont.)**

From options a), b), and c) shown below, you can check the requisition you saved in Save for later.

- a) When you save a requisition using “Save for later” it will be saved as a draft.
- b) Click on the [Requests](#) tab to see the relevant requisitions from the list of requisitions.
- c) If your permissions do not allow you to see the Requests tab on your home page, you can check it from the Requisition list in View All under Recent Activity or by clicking on [View All](#) and then on the Requisition list.

(13) Review and Edit Cart - **Submit for Approval**

1. After all requests are entered correctly, click [Submit for Approval](#) to send the approval to the next approver.

(13) Review and Edit Cart - **Submit for Approval (Cont.)**

2. You will see a message in green stating 'Requisition # submitted for approval' and the status of Req 11193 will change to **Pending Approval** in your Recent Activity section.
3. Simultaneously, the next approver will receive a notification email for approval..

(14) Review and Edit Cart - **Pending Buyer Action**

When a requisition is missing information that is required for the purchase order, the requisition will be placed on “**Pending Buyer Action**” status. This typically occurs when:

1. A requester does not select a supplier (you can intentionally leave this blank if you want/need Procurement’s support in identifying the correct supplier)
2. A requester’s ship-to address is left blank (however this should not occur since Ship To details are entered by default)
3. A requester does not enter complete billing information

It is important for requesters to ensure all required information is complete. Requests that are not filled out with all the required information will not be able to be submitted and will receive “Pending Buyer Action” status. If requesters see “Pending Buyer Action” in the approval flow, they should check their request to see what is missing. Cases in which status is in “Pending Buyer Action” but all fields are completed can be resolved by re-selecting the ship-to-address.

(14) Review and Edit Cart - Pending Buyer Action (Cont.)

If a requester does not enter complete billing information, they will receive a pending buyer action error.

1. If you have a Pending Buyer Action due to an error in your cost account information, please click on the “[magnifying glass icon](#)” under Billing.

The screenshot displays the 'Cart Items' interface. At the top, there are buttons for 'Add Line', 'Clear Cart', 'View' (set to 'All'), 'Advanced', a search bar, and 'Sort by' (set to 'Line Number: 0 → 9'). Below these are 'Edit Selected', 'Copy', and 'Delete' buttons. The main table lists cart items. The first item is 'Mask' with a price of '100.00 USD' and a description '20 x 5.00 USD / Each'. The vendor is 'NOAC INTERNATIONAL INC.'. The 'Billing' section on the right shows a red box around a magnifying glass icon, with a circled '1' indicating the action point. Below the item details, there are fields for 'Commodity' (Other - MRO), 'Need By Date' (02/14/24), 'Payment Terms' (NT30), and 'Unconfirmed Email Address' (No). An 'Add Tag' button is also present. At the bottom of the cart section, it says 'Per page 15 | 45' and 'Total 100.00 USD'. Below the cart items is the 'Approvers' section, which includes an 'Add' button and a flow diagram. The flow diagram shows three approvers: 'MT' (Miki Toh), 'Pending Buyer Action' (highlighted with a yellow box), and 'NT' (noac test). The flow ends with an arrow pointing to 'Approval Complete'.

(14) Review and Edit Cart - **Pending Buyer Action (Cont.)**

If a requester does not enter complete billing information, they will receive a pending buyer action error.

2. Enter the correct Cost Account starting with **CCX-** and choose from drop-down list of Cost Account.
3. Click **Choose**.

The screenshot shows the 'Choose an Account' dialog box. The 'Choose Chart Of Accounts' dropdown is set to 'MHIA'. The 'CoCd' dropdown is set to 'MHIA (XQ0)'. The 'CstAcct' dropdown is open, showing a list of accounts starting with 'CCX-CMD'. The account 'CCX-CMD Sales::XQ03118' is highlighted. A red box highlights the 'CstAcct' dropdown and the highlighted account. A yellow arrow points down to the next screenshot. In the second screenshot, the 'CstAcct' dropdown is now set to 'CCX-CMD Sales::XQ03118'. The 'GL' dropdown is set to 'Others (Others)'. A red box highlights the 'CstAcct' dropdown and the 'Choose' button. A red box also highlights the 'Choose' button.

What is possible after submitting a Requisition

(1) Request Change for requestor

A requester can modify the content of a submitted requisition using the withdraw function before the requisition is fully approved.

1. You can find the Withdraw icon from
 - a) Requests -> Requisitions
 - b) Recent Activity -> View All -> Requisitions
 - c) Recent Activity -> Actions
2. Click the **Withdraw Icon** with the red arrow

The screenshot shows the 'Requests' tab selected in the top navigation bar (1-a). Below the 'Good afternoon!' banner is a search bar and a 'Write a request' button. The 'Recent Activity' section (1-b) lists two requisitions. The first requisition, '100 Mask, 30 Pen' (Req # 11194), is in 'Pending Approval' status. A red arrow points from the 'View All' link to the 'Requisitions' page. Another red arrow points from the 'Withdraw' icon in the 'Actions' dropdown (1-c) to the 'Withdraw' button in the 'Requisitions' table.

Requisition status must be Pending Approval or the option to withdraw will not be available.

Requisitions

Req #	Requested By	Submitted On	Status	Items	Total	Actions
11194	Miki Toh	02/08/24	Pending Approval	100 Mask from NOAC INTERNATIONAL INC. for 200.00 USD 30 Pen from NOAC INTERNATIONAL INC. for 150.00 USD	350.00 USD	

Click

What is possible after submitting a Requisition

(1) Request Change for requestor (Cont.)

3. Then a message will appear asking if you want to confirm your withdrawal. If you want to proceed with clearing the cart, click the **OK** button.
4. The message “Successfully withdrew Requisition #...” will be displayed and the status will be changed from Pending Approval to Draft.
5. Click Pencil icon's **Edit**.

- The message “Requisition #..... is now your active cart requisition. Your old cart is available in Activity.” will be displayed at the top of the page.
- Navigate your cursor into the cart display window, and a icon will appear in the top right corner of the window. Click on it.

What is possible after submitting a Requisition

(2) Copy Requisition (Cont.)

3. After clicking Copy, the message "Requisition was copied successfully. Please note that some values may have changed to the default payment terms." will appear.
4. Navigate your cursor into the cart display window and click on it.

The screenshot shows the top navigation bar with 'Requests', 'Orders', and 'Reports'. Below it, a sub-navigation bar has 'General Info', 'Cart Items', 'Approvers', 'Comments', and 'History'. A red circle with the number '3' highlights the 'General Info' tab. A green message box with a red border and a close button (X) displays the text: "Requisition 11194 was copied successfully. Please note that some values may have changed to the default payment terms." Below the message box, there is an 'Add Tag' button and a 'General Info' section with a 'Ship To' location.

The screenshot shows the 'Cart Items' window. At the top, there is a red banner that says "Fix the incomplete lines outlined in red". Below this is a green bar with buttons: 'Add Line', 'Clear Cart', 'View' (set to 'All'), 'Advanced', 'Search', and 'Sort by' (set to 'Line Number: 0 → 9'). Below the green bar are buttons: 'Edit Selected', 'Copy', and 'Delete'. A red circle with the number '4' highlights a requisition line. The line is outlined in red and contains the following information:

Mask				Billing	
NOAC INTERNATIONAL INC.				MHIA	
100.00 USD				MHIA-CCX-CMD Sales::XQ03118-Others	
50 x 2.00 USD / Each				XQ0-CCX-CMD Sales::XQ03118-Others	
Commodity	Need By Date	Payment Terms	Unconfirmed Email		
Other - MRO	Required	NT30	Address		
				No	

Below the table is an 'Add Tag' button.

In Coupa, there are a few points in the transaction where you may be required to approve for varying reasons.

1. Requisition Approval
 - You are part of the requester's managerial hierarchy
 - The requester has added you as an ad hoc approver
 - Someone has entered a requisition on your behalf
2. PO Approval
 - You are part of the requester's managerial hierarchy and he/she has requested a change order
3. Invoice Approval
 - You are the requester and need to validate a service by approving the invoice
 - You are the requester or part of the requester's managerial hierarchy and a tolerance has failed. Since the invoice did not match the PO, after routing to AP, it will route to the requester and the requester's managerial hierarchy for re-approval.
 - You are the requester for a Non PO Invoice transaction. Since this transaction does not have documented approvals on the requisition (because there was not a requisition) the approval will route to the requester and requester's managerial hierarchy
4. Receipt Approval
 - You are part of receiver's approval chain, and he/she has received a goods or has done service validation.

Watchers can be added on an ad hoc basis. They're notified at the point of submission and full approval. Watchers are not required to take action, versus approvers who need to take action in the system.

The new DOA (used for Coupa purchases) identifies a single approval threshold depending on the employees assigned approval level:

Approval Limit	£0K	£10k	£50K	£>50K
Typical Job Titles	▪ Secretary ▪ Officer	▪ Manager ▪ Deputy General Manager	▪ General Manager ▪ Director	▪ COO

※The amount shown the above approval limit, is an example. Each company will define their own approval limit.

NOTE: *Self approval is not permitted. A request will automatically route to the requester's next approver, regardless of approval level or dollar amount of the request.*

Processing in the cart (Cont.)

(1) Review and Edit Cart - Billing

Account billing information is completed by the requester at the line level. Billing information will default based on the requester's affiliate and cost center and the commodity of the good/service.

1. If you want to change the Billing Information, click the “magnifying glass icon” located in the billing section.
2. Select billing information from the dropdown menu or type the billing information
3. Click **Choose**

Rejecting an Invoice for Dispute

If an invoice is routed to you for approval and you do NOT approve, you should:

1. Go the Coupa homepage, open the relevant invoice, and click the “Reject” button.
2. Clearly enter the reason for rejection (e.g., order is already closed, duplicate invoice etc.).

3. If the invoice is rejected by the requester or approver, notify the Accounts Payable (AP) team. The AP team should mark the invoice as “Void” to invalidate it.
4. Ask the supplier to revise the invoice outside of Coupa (via email or phone).
5. Once the corrected invoice is reissued and appears as “On Hold,” proceed with

Receipts are recorded in two different ways, depending on if the transaction includes a **goods** commodity or **services** commodity

- **North America Only:** Services require “Service Validation” approval on the invoice by the requester.
- Goods require a Goods Receipt to be entered into the system

Service Validation (North America Only)

Requesters will be required to approve invoices as validation of the service they have been invoiced for

- Service validations will appear in Coupa as invoice approvals. When a supplier invoices for a service, the original requester will receive a notification asking them to approve the invoice.
 - Approving the request indicates that the service was completed and the invoice can be paid
- For example, see the below service validation for a purchase that has the commodity “IT Consulting,” which is a service

Always type in the receipt date

To partially receive a line, type in the number to be received

Checkbox allows users to fully receive a single line

If an invoice is received in Coupa for a goods purchase before a goods receipt is entered, the requester is notified of an order pending receipt. The invoice will not be processed until the goods receipt is entered.

- Notification will be sent via email, as well as via the user's To-Do List on the Coupa homepage

The user can access the receiving screen directly via email by clicking "Receive All Pending"

The user can also access the receiving screen via the To Do List by clicking "Create Receipt"

- Once the receiving screen has been accessed, follow the steps on the previous slides to complete receipt

The Central Receiving role in Coupa allows users to receive against PO's they did not request. Users without this role can only enter Goods Receipts for requests they've submitted.

1. Navigate to the Orders tab. Central receivers have access to this tab, which end users without central receiving role do not have.

NOTE: Users may also process receiving via the following routes:

- a. Requests tab
- b. Inventory tab
- c. ASN (Advance Shop Notices)

2. Click on the truck icon next to the order that needs to be received.

- Changes to the PO can be made until the PO has been fully received. If the PO has not been fully received the option for “Request Change” will appear at the bottom of the PO details

- The PO will become open for editing and the requester can update the PO with necessary changes. The change request will be rerouted through required approvals.

- Once approved, the Change order will be submitted to the supplier.
- Note: Applying a PO Change Request to a cXML vendor will trigger a re-order.

Set Preferences & Settings (notifications)

1. On the home page, hover over your name in the top right corner of the page and click “Settings”

2. This will bring up the “Settings” page, which includes notifications. Click the “Notification” tab to bring up the page on which you can set your notifications

Set Preferences & Settings (delegates)

1. Coupa allows users to set up delegate approvers to approve on their behalf. To set up a delegate, click the “Delegates” tab

The screenshot shows a navigation bar with tabs: General, Address Book, Content, Delegates (highlighted in orange), Billing Accounts, Reports, and Notifications. Below the tabs, the heading 'Delegate Approvals' is displayed. Underneath, a message states 'You are not delegating your approvals.' followed by a green plus icon and a link 'Add a Delegate'.

2. This will bring up the “Delegate Approvals” page, where the delegate can be specified, along with the time period and reason for delegation of approval

The screenshot shows the 'Delegate Approvals' form. The heading 'Delegate Approvals' is at the top. Below it, the text 'Your approvals will now be delegated to:' is displayed. The form contains four fields, each with a red asterisk indicating a required field:

- * Delegate: A text input field.
- * Start Date: A date input field showing '01/02/17' with a calendar icon.
- * End Date: A date input field with a calendar icon.
- * Reason: A large text area for providing details.

At the bottom of the form, the text 'You will continue to receive approval notifications' is displayed. Below this text are two buttons: 'Cancel' and 'Save Delegate' (which includes a save icon).

Question	Answer
What is a Procure To Pay solution?	A Procure-To-Pay system is a fully integrated solution designed to support an end-to-end process that begins with goods and services requisitioning and ends with ready-to-pay files for upload into an accounts payable system.
What is changing?	We are optimizing our current systems and processes to minimize inefficiencies and adopt newer, more user-friendly technology with mobile functionality for indirect spend. This will change how we interact with our external Suppliers, from onboarding and buying to payment for indirect spend. See next two slides for further details.
Why are we making this change?	Coupa will allow to be more agile and more efficient in our purchasing process, as we move towards a shared services organization to manage indirect spend. For you, it should mean an easier and more efficient tool to support your business. This change will help to streamline processes and improve business efficiency for our company from Procurement to Accounts Payable
How do I know if I should use Coupa for the good/service that I am requesting?	Any indirect good or service should be requested through Coupa.
The approval chain on my requisition has an approval step called "Pending Buyer Action" – what does this mean?	"Pending Buyer Action" is a status that occurs when the following fields on a request are not populated: •Supplier •Shipping Address (will default for each user) •Billing Information (will default for each user) NOTE: When a request is "Pending Buyer Action", this simply means that Coupa has sent the request to Procurement for review of missing information. Once the missing information is completed, the "Pending Buyer Action" approval step will be removed.
How do I determine why certain approvers are added to the approval chain?	Typically, the approvers added to your approval chain will be the people in your management hierarchy (i.e. your manager, your manager's manager, and so on). However, Coupa will know to bring in other approvers depending on what the purchase request is for (e.g. MHIE IT for certain IT commodities). If a user hovers over an approver in the approval chain with his/her mouse, an explanation of why the approver was added to the approval chain will be visible.

Requisition Creation

- All indirect purchases require a requisition in Coupa
- Requisitions can be submitted through catalogs, web forms or free form requests
- Accounting information will be included on the requisition
 - Information on the requisition will default based on the user record (such as Company Code and Cost Center)
 - Billing information can be edited by the requester as needed and can be split at the line level.

Requisition Approval

- Requisition approval workflow will be automated
- All requisitions will be routed through managerial hierarchy for approval
- Additional commodity-driven approvals are required for some IT & HR commodities
- Approvers will receive notifications that they need to approve via email and in Coupa
- Approvals can be completed via email or on a mobile device, in addition to the Coupa site

PO Processing

- All approvals happen on the requisition – there is no additional action needed or separate approval on the PO in Coupa. Once a requisition is fully approved, it automatically turns into a PO and is sent to the supplier
- Accounts Payable users will resolve all PO's with missing information before they are sent to the supplier

Receiving

- Receiving will be required for all goods
- Receiving can be done by the requester or a central receiving group in Coupa
- Services will be received through a “service validation” approval once the invoice is received

Invoice Data Capture

- All invoices with a Coupa PO must be sent to MHI electronically through Coupa or to a Coupa linked email inbox
- Non-PO invoices processed in Coupa must be sent to affiliate-specific Coupa email inbox (SAP PO invoices & invoices from suppliers not in Coupa will continue to be processed in SAP)
- A requester will need to be identified on non PO invoices to ensure proper approval routing

Matching Process

- Invoices that match do not require additional approvals
- POs are set up as “not to exceed” (invoices will match a PO as long as the total PO line amount has not been exceeded)
- Tolerances are standardized across affiliates

Invoice Approvals

- Invoice approval workflow will be automated
- Non-PO invoices will go through the same approval process as requisitions (i.e. managerial hierarchy, commodity approval etc.)
- Invoice approvals will be escalated to approver’s manager after 14 days of no action
- Approvers will receive notifications that they need to approve via email and in Coupa
- Approvals can be completed via email or on a mobile device, in addition to the Coupa site

Invoice Exception Handling

- Variances (price, quantity, shipping/tax) exceptions will route to the requester followed by his/her managerial hierarchy for approval
- Approvals driven by variances will be automated
